

FOR IMMEDIATE RELEASE:

Minimize Your Energy Bills and Carbon Footprint

Jericho/Underhill, VT, Friday, June 24, 2016 at 7:00 pm

Deborah Rawson Memorial Library, 8 River Road, Jericho

On June 24, the Jericho Energy Task Force will host a presentation on Zero Energy Now, a comprehensive home energy improvement program. Through Zero Energy Now, homeowners can get efficiency upgrades, renewable heating (such as heat pumps and biomass) and solar photovoltaics that can reduce their energy costs by 50% to 100%. In addition, homeowners may be eligible for incentives from Efficiency Vermont, with additional incentives available to former CVPS customers. Only fifty homes in Vermont will be eligible for this deep energy retrofit program in 2016 and we are hoping some of these homes will be in the Jericho and Underhill area.

Come hear more about the Zero Energy Now program and how it works on Friday, June 24, 2016 at 7:00 p.m. at the Deborah Rawson Memorial Library. Meet contractors, find out about financing, and learn about how the incentives, totaling a possible \$7,500 for qualifying work, can help cover your investment in minimizing energy costs and decreasing your carbon footprint.

As always, there will be light refreshments, but we strive to be waste free, so please bring your own cup and bowl.

The Jericho Energy Task Force is Jericho's Town Energy Committee. You can reach us on Facebook, through the Town of Jericho website, or at enerjericho@gmail.com, and watch for our posts on Front Porch Forum.
